

# Anas Rezk

## Senior Frontend Engineer

Berlin, Germany • +49 176 24131935 • anasrizk01@gmail.com • [github.com/AnasRezk](https://github.com/AnasRezk) • [linkedin.com/in/anasahmedrezk](https://linkedin.com/in/anasahmedrezk)

---

### SUMMARY

---

Frontend engineer with 8+ years building and scaling web applications across startups and international teams, with deep ownership of TypeScript codebases, component architecture, and design systems. Experienced mentoring engineers and running technical interviews while contributing hands-on across the full development lifecycle — from early exploration to production monitoring. Comfortable moving fast across frameworks: led a Create React App → Vite migration, and currently architect a multi-tenant product across React, Next.js, and Angular.

### EXPERIENCE

---

#### WeatherPromise, Berlin — Senior Frontend Engineer | Feb 2025 – Aug 2025

- Built the marketing landing page from the ground up in Next.js, shadcn/ui, and Tailwind CSS, owning component architecture and responsive design.
- Integrated real-time weather data APIs into the customer dashboard to surface personalized forecasts.
- Automated waitlist and lead capture with Next.js server actions and the Google Sheets API, reducing manual onboarding work.

#### Tourlane, Berlin — Senior Frontend Engineer | Jul 2021 – Jan 2025

- Maintained and extended the company-wide design system (React, TypeScript, CSS-in-JS, Storybook), ensuring UI consistency and component reuse across 5+ applications.
- Drove the evaluation and rollout of the Create React App → Vite migration across the engineering org, cutting build times 50% and tightening developer feedback loops.
- Led the team's JavaScript → TypeScript migration, raising type coverage and reducing runtime errors across core applications.
- Introduced static analysis and testing conventions (ESLint, Husky, Lint-staged, Cypress, React Testing Library), raising code-quality standards across the team.
- Actively participated in technical recruiting and interviewing, and supported onboarding for new frontend engineers.
- Optimized long-list rendering through lazy-loading, eliminating page freezes on datasets of 10,000+ items.

#### Basharsoft, Cairo — Frontend Engineer | Nov 2018 – Jun 2021

- Built and maintained design-system components (React, TypeScript, Emotion, Storybook) and implemented server-side rendering with Node.js and Express, serving multiple product teams.

### INDEPENDENT PROJECT

---

#### Multi-Tenant Restaurant POS Platform (Dinex) — Frontend Architect (self-directed) | Jul 2021 – Present

- Architecting the frontend for a multi-tenant restaurant POS using Angular, RxJS, and TypeScript — designing state-management patterns, authentication flows, and real-time data synchronization.
- Designed and built a customer-facing digital ordering app with React, Next.js, and Tailwind CSS, defining component architecture and performance strategy.
- Built a cross-platform mobile companion app (React Native, Expo), including a native receipt-printer integration that renders Arabic receipt text as images to work around printer SDK limitations.
- Integrated Sentry for production monitoring with custom error boundaries and tenant-specific debugging, reducing mean time to resolution.

### SKILLS

---

**Languages:** TypeScript, JavaScript (ES6+), HTML, CSS / Sass

**Frameworks:** React, Next.js, Angular, Node.js, Express

**Styling & UI:** Tailwind CSS, CSS-in-JS (Emotion, Styled Components), shadcn/ui, design systems, component libraries

**Testing:** Jest, React Testing Library, Cypress, Playwright (familiar)

**Tooling:** Vite, Webpack, Git, GitHub Actions, Storybook, Sentry

**Mobile:** React Native, Expo

### EDUCATION

---

Mansoura University — BSc, Computer and Information Sciences Sep 2012 – Jul 2016
